About me:
I am a front-end web developer(React JS). I love learning new skills and techniques and always ready to take challenges that really help me to improve myself. My dream is to become an expert Software engineer and build unprecedented projects!

WORK EXPERIENCE

31/08/2022 – 27/12/2022 Jeonju, South Korea
FREELANCER FIRDAVS

I was hired by a restaurant administration named "Firdavs" to build and maintain fully-responsive, dynamic and professional-looking web-app of the restaurant. This was my solo and very first real project and I managed to develop and deploy it successfully. Since the web-app includes several features and functions like leaving a feedback and making a reservation I was required to gather all the user-info along with comments in the database(Firebase) and maintain them for several months. The production is entirely built in React JS and Material UI for the design.
